

Chroma-Q™ Broadway™

User Manual

Version 6.3 December 2006

PN: 101-0500 Broadway

Disclaimer

The information contained herein is offered in good faith and is believed to be accurate. However, because conditions and methods of use of our products are beyond our control, this information should not be used in substitution for customer's tests to ensure that Chroma-Q products are safe, effective, and fully satisfactory for the intended end use. Suggestions of use shall not be taken as inducements to infringe any patent. Chroma-Q sole warranty is that the product will meet the sales specifications in effect at the time of shipment. Your exclusive remedy for breach of such warranty is limited to refund of purchase price or replacement of any product shown to be other than as warranted.

Chroma-Q reserves the right to change or make alteration to devices and their functionality without notice due to our on going research and development.

The Chroma-Q Broadway has been designed specifically for the professional entertainment lighting industry. Regular maintenance should be performed to ensure that the products perform well in the entertainment environment.

If you experience any difficulties with any Chroma-Q products please contact your selling dealer. If your selling dealer is unable to help please contact support@chroma-q.com. If the selling dealer is unable to satisfy your servicing needs, please contact the following, for full factory service:

3.4 385-512	13

1. Product overview

The Chroma-Q is designed to be one of the most reliable colour changers available. The utilisation of digital circuitry and high technology composite materials, produces an affordable colour changer which is capable of scrolling gel strings of various lengths from 2 to 16 colours.

The Chroma-Q will read ANSI E1.11 USITT DMX 512-A protocol, which enables individual addressing of each unit. This allows for easy grouping of multiple units. The units are individually addressed by setting the 10 pin binary dip switch, as displayed in the panel view below and the instructions on page 4 section 2.2.

The Chroma-Q is supplied power and control signals by means of a XLR 4-pin connector. The XLR 4-pin output may then be used to connect other units in turn on the same line. Each chain line must be terminated by connecting the output cable from the last unit in the chain to the corresponding return connection on the PSU / splitterbox, as shown in the System Diagram on page 4.

Note: For the optimum performance of a system the Chroma-Q colour changer maximum cable length per distribution line must not exceed 60m / 200ft including the return to the PSU / splitterbox.

The Chroma-Q is equipped with an integral cooling fan. Each unit is also equipped with three diagnostic LED indicators (found on the underside of the unit); showing Power, DMX signal and DMX level (see section 2.9 Troubleshooting on page 6 for full details).

2. Operation

- 2.1 Control and power cables
- 2.2 Setting the DMX address
- 2.3 PSU / splitterbox options
- 2.4 PSU / splitterbox capacity
- 2.5 Mounting positions
- 2.6 Using Mark I and Mark II units together
- 2.7 Safety wire
- 2.8 F.C.C. Regulations (USA)
- 2.9 Troubleshooting
- 2.10 Limited warranty
- 2.11 Technical specifications
- 2.12 Product ordering

For gel string dimensions, assembly, loading and calibration - see the separate leaflet enclosed with your Chroma-Q.

2.1 Control and power cables

The Chroma-Q utilises an XLR 4-pin cable system. This is used to supply power and data transfer. Pins 1 and 4 supply 24VDC power; pins 2 and 3 supply ANSI E1.11 USITT DMX 512-A control protocol with a ground drain wire to the connector shell.

Only genuine Tourflex Datasafe cable is recommended for use with the Chroma-Q colour changing system (see Product ordering on page 8).

Damage will occur if the power connections short-circuit to the data or ground / shield connections. When assembling XLR 4-pin cables, heat shrink sleeving should be used on each individual data pin and the drain wire to prevent short circuits.

Note: It is very important to ensure that the drain wire from the cable shield is connected to both connector cases.

The cables are wired pin to pin, in the following format:

Pin #	Function
1	0V DC
2	Control data minus (-)
3	Control data plus (+)
4	24V DC (+ve)
Chassis	Ground bonding

System Diagram

Each PSU / splitterbox can accommodate two circuits. The total cable length per circuit must not exceed 60m / 200ft or a Voltage drop will be imposed on the system. The total quantity of Chroma-Q Broadway units is dependent on the size of the PSU / splitterbox. (See PSU / splitterbox capacities on page 5 or in the User Manual of each PSU / splitterbox.)

2.2 Setting the DMX address

The DMX address for each unit is set using the 10 way binary switch on the back of the unit (see page 3). The address switches are pushed up (rotated) to the on setting. Add the address together to reach the control address required. Example: $1 + 2 = 3$, $4 + 64 + 256 = 324$.

Switch position =

The DMX address is equal to the sum of the selected switches.
For example DMX ADDR. 327 =

ON OFF

1 2 4 8 16 32 64 128 256

To reduce units maximum motor speed turn Dip switch # 10 on

A complete chart of dip switch settings for DMX channels 1 to 511 is shown at the end of this manual.

The Chroma-Q can also be set to a second motor speed. By moving switch 10 on the binary dip switch to the on (up) position, the inherent speed of the Chroma-Q will decrease by approximately 50% (ideal for environments that are particularly noise sensitive).

2.3 PSU / splitterbox options

The Chroma-Q PSU / splitterboxes are available in 3 models: The Chroma-Q PS02 is suitable for a maximum of 2 Power Units (PU), the Chroma-Q PS08 is suitable for a maximum of 8 PU and the Chroma-Q Magic Box PS12 is suitable for a maximum of 12 PU. 1 unit of the Chroma-Q Broadway is equivalent to 1 PU.

Each Chroma-Q PSU / splitterbox is equipped with the following:

- 1) Red 24 Volt DC power indicator
- 2) Green DMX signal indicator
- 3) DMX 5 pin input and thru sockets
- 4) 2 x XLR 4-pin output sockets
- 5) 2 x XLR 4-pin return sockets
- 6) IEC 320 AC mains input socket

The purpose of the PSU / splitterbox is to combine the DMX control signal and the 24VDC power into individual outputs. There are two output circuits for distribution on each PSU / splitterbox, each is capable of supplying power and data for the Chroma-Q range of colour changers. The maximum cable length, including the return, for the circuit is 60m / 200ft.

Each output must be connected back to its own return. The reason for the return socket is to increase the size of the power cable to reduce Voltage loss in each circuit and to provide DMX signal termination.

2.4 PSU / splitterbox capacities

The Chroma-Q PS02 (2PU) can run up to 2 Chroma-Q Broadway units

The Chroma-Q PS08 (8PU) can run up to 8 Chroma-Q Broadway units

The Chroma-Q Magic Box PS12 (12PU) can run 12 Chroma-Q Broadway units

(For details, please refer to User Manual for each PSU / splitterbox)

2.5 Mounting Position

The Chroma-Q is designed to be mounted in an upright position with the base of the unit below the fixture. Do not mount in an inverted position with the base of the unit above the fixture, as the rising heat from the fixture may cause gel string damage.

A large number of mounting plates are available; please contact your dealer for a full list.

Always ensure that the Chroma-Q is powered before the fixture and that you reverse the procedure at the end of the show. Failure to do so may cause gel string damage.

2.6 Using Mark I and Mark II Chroma-Q CQ1's units together

Mark I and Mark II units can easily be used on the same show. To do this, calibrate the Mark I units first and last frames to the same frames of the Mark II units.

2.7 Safety wires

The safety wire supplied with your Chroma-Q should always be used.

2.8 F.C.C. Regulations (USA)

This device complies with part 15 of the F.C.C. rules. Operation is subject to the following:

- (i) This device may not cause harmful interference, and
- (ii) This device must accept any interference that may cause undesired operation

2.9 Troubleshooting

Troubleshooting of a Chroma-Q is aided by the indications provided by the 3 diagnostic LED's visibly through the Chroma-Q body. All troubleshooting procedures should begin with a LED check.

The power supplies are designed to shut down if their outputs are shorted. They will not reset until the AC supply has been disconnected and reconnected. The power supply red LED is an indicator of output Voltage not input Voltage.

Note: A high percentage of problems are caused by corrupt DMX control protocol. We highly recommend the use of genuine Tourflex Datasafe cables for all Chroma-Q colour changer and DMX control protocol cables.

Symptom	Possible Cause	Solution
All units show no power indicator (Red LED).	24V DC power supply is not providing power to units.	Check if the mains power to the PSU is ok and the red 24VDC LED is on.
Single unit power indicator is off (Red LED).	Electronics fault in unit.	Call selling dealer.
Power indicator light is flashing. (Red LED).	Gel string is jammed.	Readjust or replace faulty gel string and / or turn power off and on again. This will reset the unit.
Unit has dim power light (Red LED).	Voltage has dropped below acceptable level.	Check that the return line has been installed. Check maximum cable length has not been exceeded.
DMX indicator on all units is off (Green LED).	No DMX is present at the PSU / splitterbox.	Check that the DMX cable is properly connected to DMX input on the PSU / splitterbox. Check that DMX indicator light, located on the PSU/splitterbox, is on.
DMX indicator light on one group of Chroma-Q's are off (Green LED).	One output of the PSU / splitterbox has failed. Faulty first XLR 4-pin cable at splitterbox output.	Call selling dealer. Test cables.
Level indicator does not respond to DMX control signal (Yellow LED).	Improper address.	Reassign unit addressing.
Level indication changes intensity, but gel string does not move.	Mechanical failure.	Call selling dealer.
No power from PSU, but AC is OK.	Cable short has shut down PSU / splitterbox.	Remove all cables from the splitterbox allow 30 seconds to reset, reconnect AC supply and test. Check cables for shorts

2.10 Limited warranty

Your Chroma-Q colour changers and PSU / splitterbox are covered by a 12 month warranty against defects in manufacture. The warranty covers parts and labour but excludes the cost of freight. In the case of any warranty claims, please contact your selling dealer. If the selling dealer is unable to assist you, please e-mail support@chroma-q.com or call either number detailed on page 1.

2.11 Technical specifications

Chroma-Q Broadway Colour Changer Specification

Dimensions:	205mm (w) x 240mm (h) x 75mm (d) 8 1/8" (w) x 9 1/2" (h) x 3 "(d)
Weight:	1.05kg / 2.3lb (without mounting frame)
Aperture:	127mm / 5" diameter
Gel frame capacity:	between 2 - 16 frames
Speed:	2 seconds with dip switch 10 to Off
Speed 2:	5 seconds with dip switch 10 to On
Address:	10 way binary dip switch address up to 512 channels
Power requirements:	24V DC
Power consumption:	0.45A peak at 24V DC with dip switch 10 to On 0.9A peak at 24V DC with dip switch 10 to Off
Protocol requirements:	ANSI E1.11 USITT DMX 512-A
Body material:	UL94 V0 rated reinforced PBT compound
Body color:	Black
Mounting plate:	Mounting plates are available to suit numerous fixtures (see separate price list for current selection)
Input connector:	XLR 4-pin male (power and control protocol)
Output connector:	XLR 4-pin female (power and control protocol)
European approvals:	Complies with EU directives: EMC 89/336/EEC Class A. Harmonised standards applied in order to verify compliance with directives: EN 56022:1994, EN 50082-1: 1992 & EN 60950
North American approvals:	Radiated Emissions: Complies with FCC part 15 subpart B, class A for unintentional radiators. Low Voltage Directive: Complies with CSA 22.2 950, UL 1950

Chroma-Q PSU / splitterbox specification

Dimensions PS08:	217mm (w) x 79mm (h) x 194mm (d) 8.6" (w) x 3.1" (h) x 7.6"(d)
Dimensions PS12:	219mm (w) x 88mm (h) x 279mm (d) 8.6" (w) x 3.5" (h) x 11"(d)
Dimensions PS02:	43mm (w) x 76mm (h) x 144mm (d) 1.7" (w) x 3" (h) x 5.7"(d)
Weight PS08:	2kg / 4.4lbs
Weight PS12:	3.2kg / 7.1lbs
Weight PS02:	0.75kg / 1.7lbs
Power requirements:	115 / 230V AC (internally switchable, isolate from mains before removing cover). This power supply must be connected to ground (earth)

Protocol requirements:	ANSI E1.11 USITT DMX 512-A
Body material:	Powder-coated aluminium
Body color:	Black
Mounting options:	Either freestanding or can be hung from a hook clamp (not supplied)
Circuit out connector:	XLR 4-pin female (power and control protocol)
Return connector:	XLR 4-pin male (power and control protocol)
Power input connector:	IEC 320 10A, UL rated
Control input connector:	XLR 5-pin male (protected with clamping diodes)
Control out connector:	XLR 5-pin female (DMX link)
European approvals:	Complies with EU directives: EMC 89/336/EEC and LVD 73/23/EEC. Harmonised standards applied in order to verify compliance with directives: EN 50081-1 & EN 50082-1: 1992
North American approvals:	Radiated Emissions: Complies with FCC part 15, subpart B, class A for unintentional radiators.

2.12 Product Ordering List

CQ1/D	Chroma-Q Digital colour changer
CQB	Broadway Digital colour changer
CQM1	M1 Digital colour changer
CQM2	M2 Digital colour changer
CQM5	M5 Digital colour changer version II
CQM8	M8 Digital colour changer version II
MP1	Mounting plate for Par 64, aperture 165mm
MP2	Mounting plate for Source 4 Par
MP3	Mounting plate for Source 4 / Shakespeare
MP4	Mounting plate for 6" Leko / 360Q, 190mm × 190mm
MP5	Mounting plate 185mm × 185mm
MP6	Mounting plate 254mm × 254mm, aperture 190mm for analog
MP7	Mounting plate 254mm × 254mm, aperture 190mm for digital
MP8	Mounting plate 305mm × 305mm for digital
MPM5	Mounting frame for M5 version II
MPM8	Mounting frame for M8 version II
PS08	8PU PSU / splitterbox
MBPS12	12U PSU / splitterbox
GST16	16 frame "Theatre" gel string for Original Chroma-Q
GST16/D	16 frame "Theatre" gel string for Digital Chroma-Q
GSR16	16 frame "Rock & Roll" gel string for Original Chroma-Q
GSR16/D	16 frame "Rock & Roll" gel string for Digital Chroma-Q
GT1	Gel tabs for Digital Chroma-Q, Broadway, M1, M2
GT2	Gel tabs for Digital M5, M8 version I
ST	High temperature clear tape
PT	Paper (masking) tape
BDT	Set/3 plastic barndoor tabs for Chroma-Q, M1
BDTM	Set/3 metal barndoor tabs for M2

Chroma-Q Data Safe Chroma-Q Cables

CQC3	1m / 3ft colour changer cable, 4 pin male - female
CQC5	1.5m / 5ft colour changer cable, 4 pin male - female
CQC10	3m / 10ft colour changer cable, 4 pin male - female
CQC25	7.5m / 25ft colour changer cable, 4 pin male - female
CQC50	15m / 50ft colour changer cable, 4 pin male - female
CQC100	30m / 100ft colour changer cable, 4 pin male - female

DMX Datasafe Control Cables

DS10	3m / 10ft 5 pin XLR DMX cable, male - female
DS25	7.5m / 25ft 5 pin XLR DMX cable, male - female
DS50	15m / 50ft 5 pin XLR DMX cable, male - female
DS100	30m / 100ft 5 pin XLR DMX cable, male - female
TP	5 pin XLR DMX termination plug (120 Ohm)

Note: cables will be in metric lengths for Europe and imperial in the US
